to me

As I understand, Development Agreements have never been public as it weakens the future negotiating position of the municipality. Although certain items in the agreement have been discussed in public, the agreement itself has not been shown in its entirety. I do not feel comfortable attaching the document for public viewing until I have had a discussion with Council on how they would like to proceed going forward.

Subject: Re: Agenda for Committee of the Whole meeting

Further where is this policy contained? Is it in a bylaw? Can I see the existing policy and when it was implemented?

The entire matter was discussed at a C.O.W. meeting and the public has a right to know what is being voted on and what provisions have been included in the agreement. You are not being transparent if it is not made public.

Heather,

Development Agreements have not been made available to the public in the past as they relate to contract negotiations.

Item 5.1 does not have a copy of the Development Agreement attached. That should be available to the public to view prior to the meeting.
